Experience

Frontend Developer

Freelance, Nov 2022 - Current

- Used React, JavaScript, and CSS to create custom websites for local businesses that enhanced their sales.
- Improved customer interaction by incorporating responsive designs that ensured optimal mobile and desktop visibility.
- Executed the migration of outdated multi-page user interface into modern, responsive single-page application using React.

Frontend Simplified Support, Oct 2022 - Current

- Assisted students in an online community by addressing their inquiries and providing guidance on best practices in HTML, CSS, JavaScript, and React.
- Applied advanced debugging techniques using React and Redux dev tools as well as Google Chrome inspect tool to resolve technical issues.
- Successfully communicated and demonstrated challenging programming concepts, such as responsive website development CSS layout, Promises, and API request, to simplify their understanding and implementation.

Frontend Developer Internship | [Certificate](#)

Frontend Simplified, Aug 2022 - Oct 2022

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels.
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing.
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment.

Change Healthcare / PDX

Support Developer Analyst, Mar 2019 - Mar 2022

- Triaged and assisted in identifying root cause in non-production and production environments to align with customer expectations for Kaiser Permanente’s pharmacy system.
- Identified and wrote SQL commands to collaborate with Dev team in identifying impacted data for environment and code related issues experienced in non-production environments.
- Reproduced and documented defect scenarios in QA environments by sending Soap UI messages, tailing logs, and processing tasks in pharmacy workflow.
- Monitored and updated Jira defects with productive and concise comments to maintain clear communication between on-shore and offshore teams.
- Attended and led meetings between developer teams and customer to discuss live triage, releases, patch deliverables and code reviews to align with the project’s agile framework.
